

DEEPTHI T

Technical Lead | Full-Stack Developer & Solutions Architect

Bangalore, India | +91 81052 94647 | deepthit285@gmail.com

Portfolio: <https://deepthimagician.netlify.app/> | GitHub: <https://github.com/Deepthi285krishna>

PROFESSIONAL SUMMARY

Results-driven Technical Lead and Solutions Architect with 13.7 years of experience building high-scale, secure enterprise software, robust database architectures, and AI-driven automation systems. Extensive expertise in the healthcare domain (managing portals like ASCWebQI). Proficient in full-stack .NET and Python ecosystems, RESTful API design, database optimization, and modern UI architectures. Known for taking absolute ownership of systems, simplifying complex enterprise structures, and mentoring engineering teams.

TECHNICAL SKILLS

- **Backend & Frameworks:** C#, .NET Core, ASP.NET MVC, Web API, Python (Django, FastAPI), REST APIs
- **Frontend & Scripts:** React JS, JavaScript, TypeScript, jQuery, Bootstrap, Kendo UI, SvelteKit, HTML/CSS
- **Databases & ORMs:** SQL Server, PostgreSQL, LINQ to SQL, Entity Framework (EF Core)
- **BI & Reporting:** Power BI, SSRS, Paginated Reports
- **Tools & Practices:** Azure DevOps, Git, Visual Studio, VS Code, Postman, Open XML
- **Architecture & Design:** Clean Architecture, SOLID Principles, MVVM, SDLC/STLC Automation

ENTERPRISE & PROFESSIONAL EXPERIENCE

Technical Lead | ASCWebQI (Healthcare Quality Portal)

2022–Present

- Single-handedly managing enhancements, database optimization, deployments, and code reviews.
- Lead database schema refactoring and migration planning from legacy frameworks to modern Web APIs.
- Orchestrate Azure DevOps pipelines and coordinate release cycles for client deployments.

Full-Stack Developer | ASCWebQI

2018–2022

- Designed and engineered core components: Credential Tracker, Incident Management, and Policy Modules.
- Optimized SQL Server procedures and built automated SSRS reporting triggers.
- Built user interfaces using Bootstrap, jQuery, and Svelte components.

BI Developer | Power BI Integration

2017–2018

- Engineered interactive metrics monitoring dashboards for elder care facility incident reporting.
- Connected Power BI dashboards with legacy SQL Server database tables for real-time tracking.

Software Engineer | WebForms Conversion

2016–2017

- Modernized and rebuilt legacy WebForms systems into standard SSRS reports.

Software Engineer | iPortal Migration

2014–2016

- Migrated legacy Windows Forms healthcare application to ASP.NET MVC web framework.

Software Engineer | IHN (Integrated Health Network)

2013–2014

- Upgraded elder care database system from VB.NET to Windows Forms WinForms structures.

PERSONAL INTERESTS & AUTOMATION PROJECTS

- **Magician Future Developer Hub** ([C#](#), [.NET MVC](#), [OpenAI API](#), [SQL Server](#))
AI-driven SDLC/STLC automation orchestrator. Integrates specialized agentic bots (UserStoryBot, QA Bot, DevBot, DeliveryBot) to automatically generate Agile backlogs, QA test cases, and estimation metrics.
- **Magician Education Hub (Litelab)** ([C#](#), [.NET 8 Web API](#), [React JS](#), [EF Core](#))
Multi-tenant learning portal featuring granular multi-role access controls (Principals, Teachers, Students), roster management tables, and dynamic color-coded diagnostics debugger panels.
- **RPARReviewAuditTDS** ([Python](#), [FastAPI](#), [openpyxl](#), [ReportLab](#))
FastAPI compliance auditor that parses technical datasheets, highlights specification deviations, overlays digital signatures, and exports compiled PDF reports.
- **Magician Instructor (AutoMage)** ([Python](#), [Playwright](#), [SQLite](#))
Data crawling pipeline driven by Playwright to scrape external educational course structures and automatically seed LMS schemas.
- **ExploreCoders** ([C#](#), [.NET MVC](#), [SQL Server](#))
Programming language education platform integrated with structured curriculum lists.

EDUCATION

Bachelor of Engineering (BE) in Computer Science & Engineering

Visvesvaraya Technological University (VTU), Bangalore | Graduated 2011

KEY ACHIEVEMENTS

- Independently designed and managed healthcare validation compliance portals (ASCWebQI).
- Pioneered the Magician AI Suite to automate sprint planning, bug tracking, and developer templates.
- Built dynamic templates and automated generator utilities to boost development team efficiency.
